Management:

WORD FROM COMPANY EXECUTIVE AND GENERAL MANAGER

About us

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
أَنَا فَتَحْنَا لَكَ فَتَحْنَا لَكَ فَتَحْنَا مُبِينًا
صدق الله العظيم

MasaPlast company has been established since 2009 specializes in plastic recycling industries in the local market of Egypt in terms of providing clever solutions through plastic recycling, especially polyethylene high & low density used in multiple applications particularly in the areas of packaging bags and soil lining to decrease water absorption as per modern technologies applications, and membranes used in the fields of insulation and lining and so on.

MasaPlast provides its services at the highest levels of precision, efficiency and commitment owing to our belief in the need to contribute the promotion of productive projects related to industry, agriculture and the environment.

Within a short period of time, **MasaPlast** becomes trustful for our customers in particular through a policy of studying customer needs before and after their production and work together to remove any obstacles, we strive keep development and innovation in order to serve better.

10 YEARS EXPERIENCE:

MASAPLAST incorporated since 2009 in Alexandria- Egypt, started with a small-scale production facility in BORG ELARAB industrial city, gradually forward through a few years of tireless determination and well-placed investments, MASAPLAST has a fixed and strong foundation in recycling waste plastics from end-of-life into authentic durable raw material for plastic products.

Our Vision:

- Excellence and competitiveness.
- Effectively participating in clean environment through recycling.
- Creating new jobs in the local market.
- Export to neighboring countries in the continent of Africa.
- We aim to deliver excellence every time, to be a recognized between leaders companies as well as valued contributor to Egyptian economic and social progress wherever we operate.

Our mission and commitments

- We are committed to excellence customer service and as prompt demanded, moreover delivering high quality products that does more reliable.
- All team members are committed to Work hard looking for lead in plastic recycling field.
- Continue to deliver innovate and creative solutions to improve work processes, in order to create and deliver the best value.

Our Policy

Our company policy is based on the following:

1. Development of environmental protection and improving occupational health and safety the top priority.
2. The company is committed to identify and approach the planning and implementation of their goals.
3. The need for compliance with laws and regulations concerning the activity of our company.
4. Work on the improvement of system performance.
5. Improving the efficiency of energy use.
6. Analyze potential risk management in a way that prevents the root causes of accidents.

Services

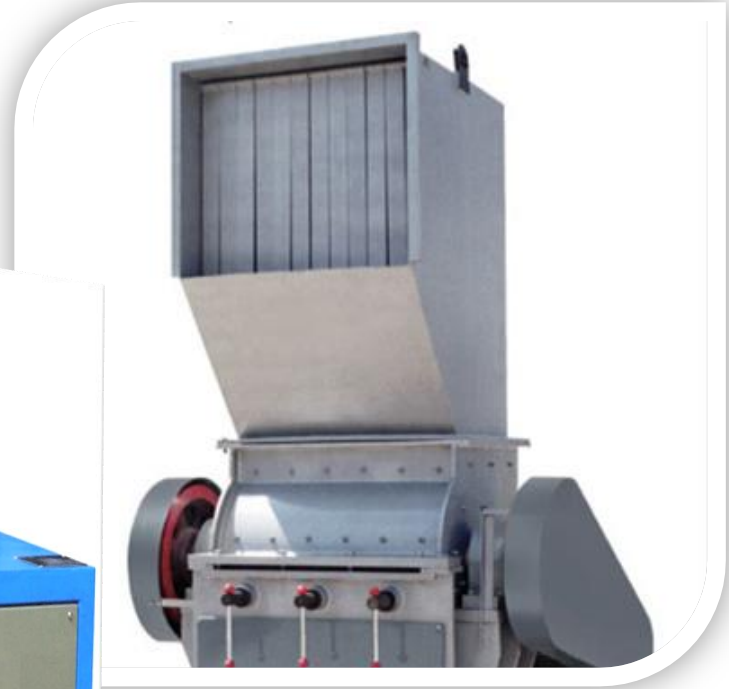

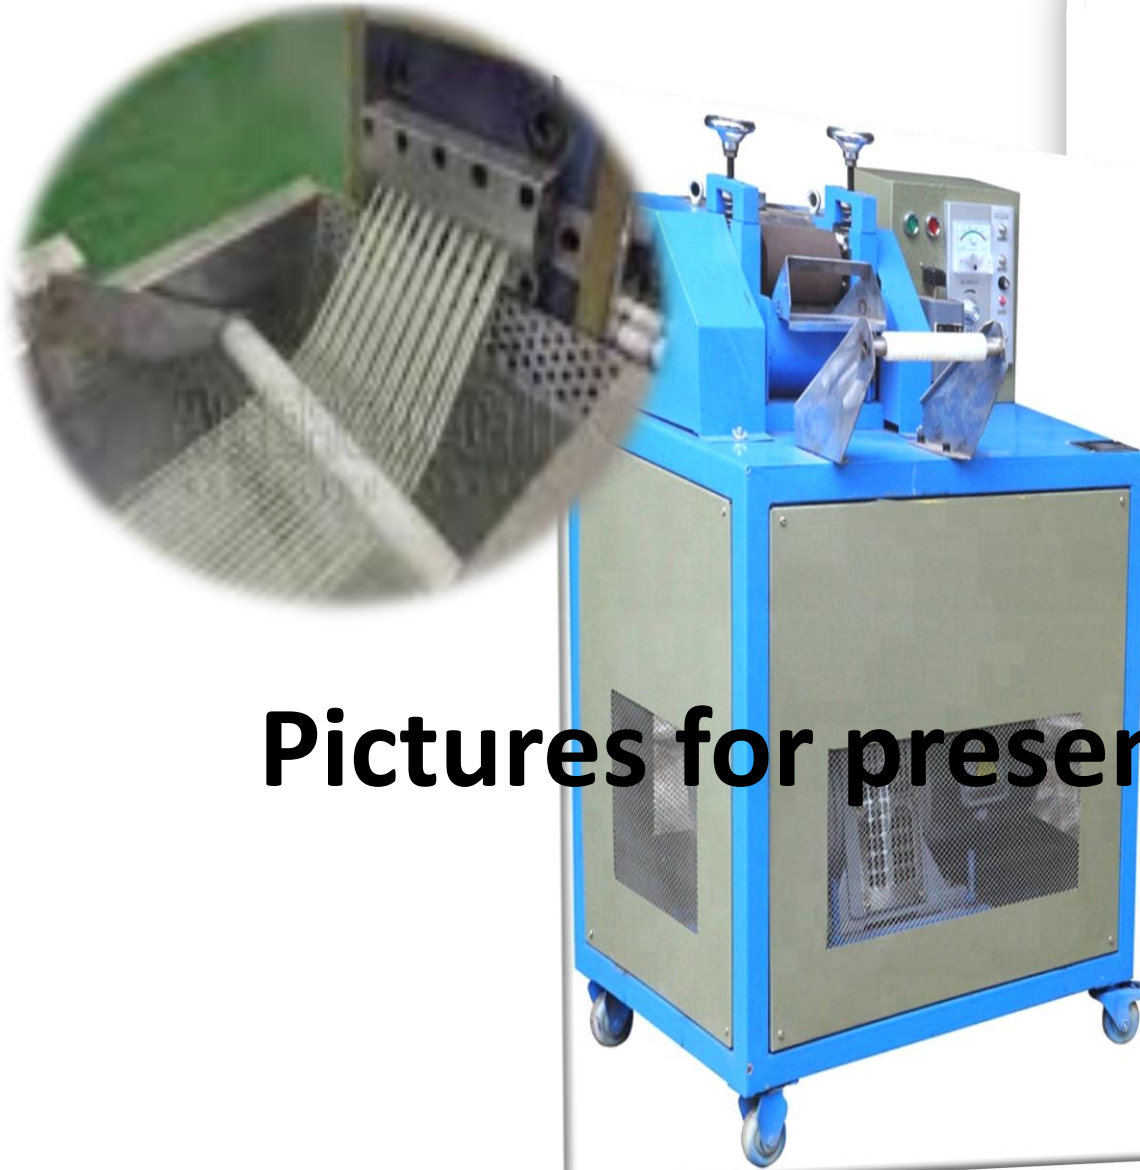

WE SELL WE PURCHASE

- **WE SELL:**

- Cleaned grind and crushed Plastic Waste any quantity.
- High quality Pellets in different colors.

- **WE PURCHASE:**

- Plastic Waste & Scrap in various form, bags/ Films/ Rolls/ Bailed Scrap.
- Regrinds.

Business Processes & Activates

❖ Plastic Scrap Inspection & Sorting.

❖ Crushing & Grinding.

❖ Washing and Drying.

❖ Granulating.

❖ Pelletizing & Final packaging.

Inspection, sorting, segregation

**Plastic sorting according to their resin
type !**

**Washing,
Dehydrating,
Drying !**

Crushing and grinding process

Pelletizing & Final Packaging

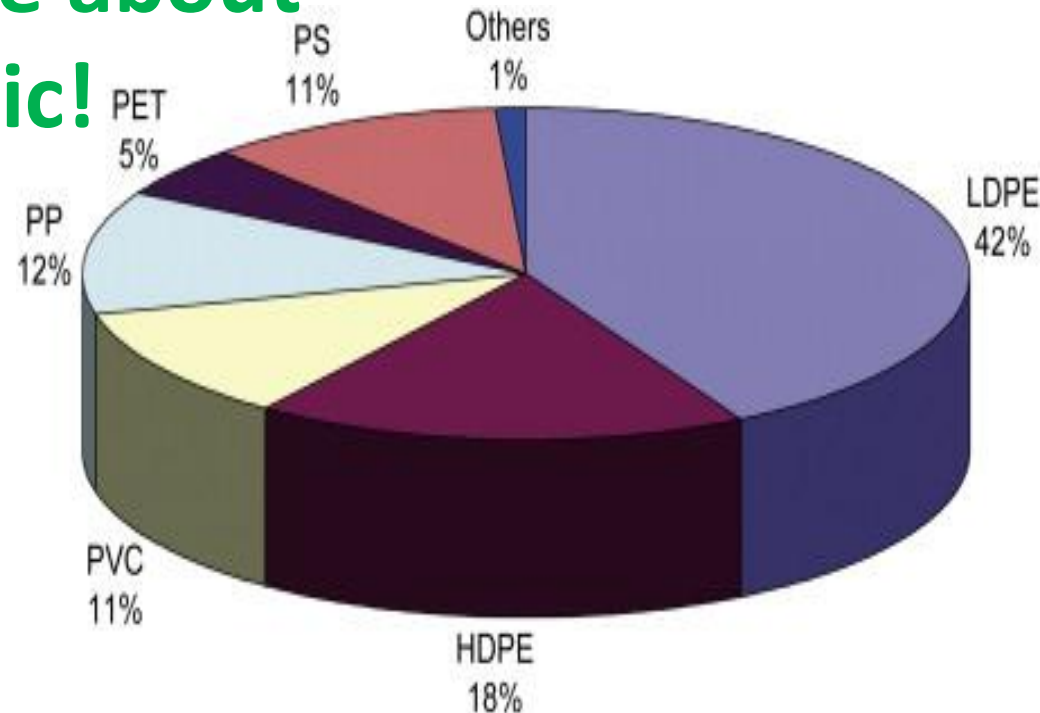

Environmental Health Safety & Quality

- **Plan-Do-Check-Act** is our management methodology for continual improvements.
- We strive to understand our customers' needs and exceed their expectations.
- We do this through strict quality control and process control in our manufacturing environment.
- As a further measure to ensure a continuous and totally responsive service to our clients, **MasaPlast** is highly committed to all Egyptian regulation and standards in all aspects of the operational cycle.
- Promote staff safety wherever we operate to ensure the product, user and environment quality & safety at once.

Plastic Knowledge

Knowledge about Plastic!

Since the vast majority of plastic is non-biodegradable, recycling is a part of global efforts to reduce waste and scrape of plastic, Plastic Recycling keeps plastic out of landfills where it can last 500 years to break down!, Waste plastics are mixed of several types but mostly composed primarily of low and High density polyethylene products. These two types make up nearly 60% of all waste plastic production. Polypropylene comes in the second level of waste, both types PE & PP are able to be recycled.

Knowledge about Plastic !

The most commonality seven types and popular known types of plastic include:

1. Polyethylene Terephthalate (**PETE or PET**): used in beverage bottles.
2. High-Density Polyethylene (**HDPE**): used for a wide variety of products such as purifier and detergent containers.
3. Polyvinyl Chloride (**PVC**): one of the oldest synthetic materials in industrial production used in a variety of applications such as in building and construction, health care, electronics, automobile, piping, blood bags, wire and cable insulation, windshield system components and more.
4. Low-Density Polyethylene (**LDPE**): used in kids toys, bags, Packaging and containers.
5. Polypropylene (**PP**): is widely used in various applications due to its good chemical resistance and weldability. Some common uses of polypropylene include: Packaging Applications, Good barrier properties, high strength, good surface finish and low cost make Polypropylene ideal for several packaging applications.
6. Polystyrene (**PS**): is used for producing disposable plastic cutlery and dinnerware, CD, smoke detector housings, plastic model assembly kits.
7. Miscellaneous plastics includes: polycarbonate, polylactide, acrylic, acrylonitrile butadiene, styrene, fiberglass, and nylon.
